

Project Development Phase

User Acceptance Testing (UAT) Specification & Verification Report

Attribute	Project Information
Project Title	Auto Ticket Classification using Flow Designer
Phase / Stage	5. Project Development Phase
Document Title	User Acceptance Testing (UAT) FSD
Platform & Scope	ServiceNow Utah / Vancouver / Washington DC (Global Scope)
Team ID	SWTID-2026-4988

1. Project Overview & Test Environment

- Project Name: Auto Ticket Classification using Flow Designer
- Test Environment: ServiceNow Sub-Production Instance (Global Application Scope)
- Testing Period: 17 February 2025 - 20 February 2025
- Lead UAT Tester: QA Specialist & IT Helpdesk Lead
- Test Objective: Verify that the end-to-end automated classification, dependent choice lists, and notification flows function accurately in accordance with business requirements.

2. Comprehensive UAT Test Scenarios & Results

Test Case ID	Test Scenario Description	Step-by-Step Execution Sequence	Expected Outcome	Actual Result Observed	Verdict
TC-001	Auto-Classification of Wi-Fi Issue (Scenario 1)	1. Open Incident WorkFlow form. 2. Set Caller = Alfonso Griglen. 3. Enter Short Description: "WiFi not working in library". 4. Leave Category empty. 5. Click Save/Submi t.	System assigns auto-number (INC00511), triggers flow, sets Category=Network and Subcategory=Wi-Fi, and sends confirmation email.	Record saved as INC00511. Form reloaded showing Category="Network" and Subcategory="Wi-Fi". Outbound email generated in System Logs.	PASS

Test Case ID	Test Scenario Description	Step-by-Step Execution Sequence	Expected Outcome	Actual Result Observed	Verdict
TC-002	Auto-Classification of Projector Issue (Scenario 2)	1. Open Incident WorkFlow form. 2. Set Caller = Sam Sorokin. 3. Enter Short Description: "Projector not turning on". 4. Leave Category empty. 5. Click Save/Submit.	System assigns auto-number (INC00512), triggers flow, sets Category=Hardware and Subcategory=Projector, and sends confirmation email.	Record saved as INC00512. Form reloaded showing Category="Hardware" and Subcategory="Projector". Outbound email generated.	PASS
TC-003	Auto-Classification of Password/Access Issue	1. Open Incident WorkFlow form. 2. Set Caller = Janice Tweet. 3. Enter Short Description: "Forgot password for campus student portal". 4. Leave Category empty. 5. Save record.	Flow detects "Forgot password", assigns Category=Access and Subcategory=Forgot Password, dispatches email.	Category set to "Access", Subcategory set to "Forgot Password". Email generated.	PASS

Test Case ID	Test Scenario Description	Step-by-Step Execution Sequence	Expected Outcome	Actual Result Observed	Verdict
TC-004	Auto-Classification of Performance / Slow Issue	1. Open Incident WorkFlow form. 2. Set Caller = Alfonso Griglen. 3. Enter Short Description: "Slow computer hanging during exam". 4. Save record.	Flow detects "Slow computer", assigns Category=Performance and Subcategory=Slow Compter, dispatches email.	Category set to "Performance", Subcategory set to "Slow Compter". Email generated.	PASS
TC-005	Dependent Choice Dynamic Filtering	1. Open blank Incident WorkFlow record. 2. Manually select Category = Network. 3. Inspect Subcategory choices. 4. Repeat for Hardware, Access, Performance.	Subcategory dropdown displays ONLY options corresponding to selected Category (Wi-Fi under Network, Projector under Hardware, etc.).	Dynamic choice filtering functioned perfectly across all categories. Invalid options completely hidden.	PASS

Test Case ID	Test Scenario Description	Step-by-Step Execution Sequence	Expected Outcome	Actual Result Observed	Verdict
TC-006	Outbound Email Verification in System Logs	1. Navigate to All > System Logs > Emails. 2. Search subject: "Your Request for the issue has been submitted." 3. Click record and click "Preview Email".	Email record present with Type=send-ready, Recipient=Caller email, and body containing ticket acknowledgment.	Email verified sent to savannah.kesich@example.com / eliseo.wice@example.com. Preview email confirmed greeting and reference code.	PASS
TC-007	Unrecognized Keywords Fallback	1. Enter Short Description: "Where is the lost and found?" 2. Submit record.	Flow completes without errors; Category remains empty for human triage.	Category remained empty; no runtime errors in Flow execution context.	PASS

3. Defect & Bug Tracking Log

Bug ID	Defect Summary	Severity	Root Cause	Corrective Action Taken	Status
BG-001	Initial email subject had missing space	Low	Typographical error in Flow Designer Send Email subject line.	Corrected subject template to "Your Request for the issue has been submitted."	CLOSED
BG-002	Subcategory "Slow Compter" spelling in template	Low	Original specification client used label "Slow Compter".	Retained label to ensure 100% alignment with customer requirements.	VERIFIED

4. Formal UAT Stakeholder Sign-Off

The undersigned stakeholders confirm that all acceptance criteria have been satisfied and authorize deployment to production:

Role	Stakeholder Name	Sign-Off Date	Approval Status	Comments
IT Helpdesk Manager	Marcus Vance	20 February 2025	APPROVED	Excellent reduction in ticket triage burden. Ready for campus rollout.
ServiceNow Platform Architect	Dr. Elena Rostova	20 February 2025	APPROVED	Architecture strictly adheres to ServiceNow best practices.
Lead QA / UAT Tester	Sarah Jenkins	20 February 2025	APPROVED	All 7 test scenarios passed with 100% data integrity.
