

Project Development Phase

User Acceptance Testing (UAT) Executive Summary & Sign-off Report

Attribute	Project Information
Project Title	Auto Ticket Classification using Flow Designer
Phase / Stage	5. Project Development Phase
Document Title	UAT Final Report
Platform & Scope	ServiceNow Utah / Vancouver / Washington DC (Global Scope)
Team ID	SWTID-2026-4988

1. Executive UAT Summary

This report summarizes the formal User Acceptance Testing conducted for the "Auto Ticket Classification using Flow Designer" implementation. Testing was executed over 4 business days in a dedicated sub-production clone environment. Business users, campus helpdesk staff, and system administrators validated all primary workflows including record auto-numbering, keyword evaluation, dependent dropdown rendering, and email dispatch.

2. Test Execution Scorecard

Testing Metric	Quantity / Percentage	Operational Implication
Total Test Scenarios Executed	7 Scenarios	Full coverage across all 4 issue categories, boundary cases, and logs.
Scenarios Passed Successfully	7 Passed (100%)	Zero test failures or unexpected system exceptions.
Critical Defects (Sev 1 / Sev 2)	0 Defects	Platform stability and data safety verified.
Minor Cosmetic Findings (Sev 3)	2 (Resolved immediately)	Email subject line and choice label alignment confirmed.
Overall Acceptance Score	100% PASS	Authorized for production packaging via Update Set.

3. Key Verification Findings

1. High Classification Accuracy: All ticket submissions containing target keywords ("WiFi", "Projector", "Forgot password", "Slow computer") were categorized correctly 100% of the time.
2. Flawless Choice Dependency: The Category-Subcategory dependency prevented any mismatched data entries.
3. Outbound Notification Delivery: The email notification engine dispatched confirmation emails to caller email addresses within 2 seconds of ticket creation.
4. Audit Compliance: All flow executions were permanently logged in Workflow Studio execution history and System Logs.
